Course Bibliography

For each topic we address in this course, we are barely scratching the surface. There are many papers, articles, and books that could have been included, but which I left out for various reasons. Below, I've collected some of my favorite readings that did not make the final cut for the syllabus. They provide great starting points for follow-up reading, research project ideas, and qualifying exams. I have organized them into the same thematic groupings used in the course as a whole. For any particular topic or concern, please feel free to follow up with questions!
